Adopted by the Cumberland County Board of Supervisors June 10, 1998

Cumberland County Policy for Building on Shrink-Swell Clays

If Shrink-Swell Clays are found to be present during the footing inspection, for any structure regulated by the Uniform Statewide Building Code, the Building Code Official shall determine if a designed footing and foundation is required for that structure. If a design footing and foundation is required, the design must be by an engineer or architect licensed by the state of Virginia, and be based on site-specific soil investigation, or presume the presence of high shrink-swell soil and design to overcome the limitations presented by these soils.
